

ZACHARY GOLD

FULL-STACK SOFTWARE ENGINEER

zacharygold@gmail.com \ \ [LinkedIn](#) \ \ [GitHub](#) \ \ [Portfolio](#) \ \ New York, NY

Technical Skills: JavaScript | Python | Flask | React | Java | express.js | postgresSQL | AWS & Cisco Certified

Relevant Skills: Google Suite | Data Analysis | Client Management | Customer Service

PROJECT EXPERIENCE

SUPERGOODENOUGH | Javascript | Python | Flask | React | Redux | Docker [GitHub](#) \ \ [Live](#)

- Developed custom user authentication by implementing BCrypt hashing on the backend and React Auth Routes on the frontend, ensuring secure password storage.
- Designed and implemented a PostgreSQL database architecture, ensuring reliable access to application-critical data.
- Built backend routes using Python with Flask, facilitating seamless communication between the React and Redux frontend and the PostgreSQL database, with migrations managed by Alembic and SQLAlchemy.
- Managed RESTful APIs using asynchronous JavaScript with React.js and Redux for state management, enabling full CRUD functionality.
- Integrated AWS S3 buckets with IAM Users to allow for the easy rendering of images related to routes and ascents.

HEAPLEAK | Javascript | Python | Flask | React | Redux | Docker [GitHub](#) \ \ [Live](#)

- Collaborated with a distributed team of four engineers, effectively managing time, dividing workload, and delegating tasks, while providing feedback on functionality through Agile development practices.
- Supervised UI/UX design and CSS styling, ensuring the site is intuitive for users and that branding, color schemes, and font choices reflected the team's vision.
- Contributed to the implementation of CSS media queries to ensure consistent functionality across different screen sizes.
- Implemented and oversaw the use of Git feature branching for quality control and clean merges.

WORK EXPERIENCE

ADELPHI UNIVERSITY | *Endpoint Integration Engineer* | Garden City, NY **February 2020 – December 2021**

- Maintained a multi-campus networking environment comprised of approximately 10,000 endpoints (including mobile and IOT devices), alongside technology and customer service specialists
- Administered critical production servers and performed scheduled maintenance (both on-premise and in cloud environments)
- Seamlessly transitioned (during COVID-related shutdown) approximately 1,000 University employees from an on-premise work modality to a remote work modality in a narrow timeframe and with limited IT resources
- Spearheaded multiple capital projects from conceptualization to completion, delivering on-time and under budget (last project was delivered approximately 20% under budget)
- Mentored and supervised student employees, both direct reports as well as student personnel working at the University Helpdesk

ADELPHI UNIVERSITY | *Remote Site Technician* | New York, NY **July 2019 – January 2020**

- Successfully deployed hundreds of IT assets in compliance with the university's hardware refresh campaign

ADELPHI UNIVERSITY | *Paid Intern* | Garden City, NY **June 2013 – June 2019**

- Collaborated with technology and customer service specialists to troubleshoot operating system software and iOS / Android devices

EDUCATION

App Academy \ \ Full Stack Web Development

Completed 08/2024

Adelphi University \ \ *B.S- Information Systems* | Garden City, NY
